The trip to Nova Scotia exceeded my expectations with stunning scenery only surpassed by the wildlife. Our trip in early June coincided with a Bay of Fundy new moon tidal bore of 42 feet and the three of us watched a wide river rise ten feet in 15 minutes. On the boat trip around the Bird Islands we saw nesting puffins, moorhills, great blue herons, bald eagles, double crested cormorants, and black guillemots. A moose along the Cabot Trail was a wonderful addition.

Expect to see some upcoming paintings inspired by this Canadian Atlantic province.

This sweetie we have a few additions to the family. Occupies a black and white kitten we adopted from Spokane County Regional Animal Protection Service, a local rescue center. She is a ball of energy and mischievous behavior when she'll chase empty tin bag sleeves, sit in the chair next to me watching my hands, or fall asleep in my lap while I paint.
